EXPERIMENTS OF MICROGRAVITY PHYSICS ON BOARD THE SJ-10 RECOVERABLE
SATELLITE

Abstract

The SJ-10 Recoverable Satellite Program is now in the phase of engineering development, and 10 facilities of microgravity physics and 9 facilities of space life science are designed and developed. The satellite is planned to be launched in the late of 2015 or a bit later. This presentation will give a brief introduction on the recoverable satellite and the experiments of microgravity physics.
