THE ROLE THE SOCIAL MEDIAS IN SPACE EDUCATION AND OUTREACH

Abstract

social medias are now more accepted by young people,even very familiar to primary school students.The agency or institution deal with space education should learn more to use the social media.By constructing an open and interactive environment, the youth are are more likely to participate with the space education activity. The education effect are improved at the same time. This paper try to give an example illustration in how to construct such new media space education platform.
