PRESENT SITUATION AND DEVELOPMENT TREND OF CHINESE COMMERCIAL SPACE
TOURISM

Abstract

In this paper, According to the present stage of international commercial space tourism situation, the operation mechanism, laws and regulations, commercial activities, operating costs and security of Chinese commercial space tourism was introduced. Comparing to the international leading level, the gap and shortcomings of national tourism was analyzed. And constructive and feasible suggestions for tourism development of our country's commercial space were given. The author is looking forward to the development and prosperity of China's commercial space, and we believe commercial space will become the development trend with the diversified development of commercial space activities in the near future. It makes great contributions to the 'space dream' of ordinary people from development of aerospace science and technology.
