BASIC ELEMENTS IN THE MULTI VERSE

Abstract

The scientists till today know only $10^{8+10(118)}$ Particle. Here the research going to reveal more than 200, it's explained in the Saiva siddhantha philosophy. Which where spreads over multiverses. The other thing is about distance. According to Saiva Agamas one astronomical unit means One Yojana. (according to various calculation) it may be considered to 10 to the power of 32 meter. Like this so many things will be decoded here.
