SPACE TECHNOLOGY INNOVATIVE SOLUTION TO INCREASE THE SCOPE OF SUSTAINABLE
BUSINESS AND MARKET DEVELOPMENT IN COMMERCIAL AND CIVILIAN DOMAIN.

Abstract

This paper assesses the success of the publically funded Space technology spinoff to low cost innovative product within the frame work of the Public and commercial domain collaboration. How this technology has helped not only the space sector but its spinoff is returning more value of money spend on it. Additional it also set forth the frame work for the future technology and its feasibility to be accepted by the industries, government and user. Digital Economic supported by space Sector which is steadily grown and evolving, has become more open, making product more accessible and acceptable with decrease in price. To sustain the business of traditional service, new Scenario is pushing industry player to collaborate in the area of innovative service. This allows creating profitable areas thus making the digital economy increase its scope and impact
