THE PUBLIC AWARENESS AND OUTREACH OF THE KOREAN ASTRONAUT PROJECT

Abstract

The First Korean astronaut has completed space mission on the International Space Station(ISS) and safely returned from April 8 to April 19, 2008. On ISS, the Korean astronaut has performed 18 space experiments successfully. After the Korean astronaut's successful missions, she had been many activities for the public awareness and outreach of the Korean Astronaut Project. In this paper, these activities and effects will be explained.
