THE MODE OF THE SPACE OUTREACH TO THE CHINESE GENERAL PUBLIC

Abstract

Generations of Chinese have dreamed of flying in order to explore the mysteries of the space. As the time flying and the technology developing, the space science is no longer out of reach. How to clearly show and effectively popularize the space science will be the main subject in this paper. The unique Chinese traditions and lifestyles are also spawning the space outreach in such a Chinese way. In this paper, many popularizing methods such as observatory, planetarium, star party, community outreach are adapted and improved in the Chinese social background. Further more, this paper explores the unique Chinese mode of space outreach to the general public.
