BOEING CST-100 SPACECRAFT AND COMMERCIAL CREW TRANSPORTATION SYSTEM: A
GLOBALLY AVAILABLE SPACE TRANSPORTATION SOLUTION

Abstract

NASA's Commercial Crew Program represents the creation of the sole U.S. capability for ISS crew transport. The Boeing CST-100 Commercial Crew Transportation System has been designed and developed to support this objective of NASA's. While NASA's Commercial Crew Development program began in 2009, Boeing has been able to take advantage of and incorporate decades of cross-company commercial and government aerospace program experience to create the safest and most affordable human space transportation capability that will be available commercially to domestic and international customers.
