

26th IAA SYMPOSIUM ON SPACE AND SOCIETY (E5)  
Interactive Presentations (IP)

Author: Mr. James Struck  
NASA, United States

8 NEW MAP INVENTIONS SHOW THAT MAPS CAN STILL BE USED TO PRESENT NEW IDEAS  
LIKE BEYOND UNIVERSE, BETWEEN UNIVERSE, NEW ATOMS, NEW CHEMICAL ELEMENTS,  
ARGUABLE PRESIDENTS, AND IMAGINARY ANIMALS

**Abstract**

Some maps that I invented are

Chemical Elements Discovered Map showing where on the Earth all the chemical elements were discovered including my recent element discoveries of Backium, Struckium, Strakalaitisium, Neutroprotonium, Electroneutroprotonium and Varicombarium

Beyond and Between Universe Map showing our Universe mapped alongside the Beyond and Between Universe

Extinct Animals Map showing roughly where extinct animals existed

New Memorials Map shows the Spanish American War Meatpacking memorial, Extinct Animals Memorial, Astronaut Victims memorial, America's War Against Weak Memorial throughout the US

The Arguable Presidents Map shows where Samuel Tilden, Albert Gore, James T. Struck and others who arguably won Presidencies lived or were born

The New Atoms Map shows linear, Solar System, circular, square, rectangular and Reverse Atoms that I invented mapped

The Religious Invention Map shows where on the Earth the world's major religions were invented

The Imaginary and Mythical Animals Map shows where some imaginary animals were or existed

New Maps can be used to show chemical, astronomy, physics, biology, religious ideas.

James T. Struck BA, BS, AA, MLIS
