INSTITUTIONAL SPACE ASSET PROTECTION PROGRAM RISK MANAGEMENT

Abstract

This presentation will summarize NASA's risk management process within the agencies Space Asset Protection Program (SAPP). The objective of the SAPP is to assure the space architecture through the protection of the U.S. space systems and its supporting infrastructure. Discussion will cover general risks to space systems and their supporting infrastructure, national policy, NASA's Space Asset Protection Program, and the subcomponent Institutional Space Asset Protection Program and briefly identify ongoing and future actions.
