NASA ASTROPHYSICS PROGRAM: RESULTS, PROGRESS, AND LONG TERM STRATEGY

Abstract

NASA conducts a robust program of astrophysics projects, featuring space flight missions both ongoing and in formulation. The WFIRST mission is currently in formulation, James Webb Space Telescope is in final development, and several studies are kicking off in preparation for the upcoming Decadal Survey. The key emergent results are summarized, and the status of project currently in flight, currently in development, and currently in formulation are summarized in this invited presentation.
