RESEARCH ON THE PROMOTION OF SPACE CIVIL

Abstract

At the beginning of twenty-first Century, the domestic and international aerospace industry has made considerable progress, but its scope of influence and promotion is still very limited. Can not be compared with the last century, the United States, "Appollo" program, including liquid fuel rockets, microwave radar, radio guidance, synthetic materials, computers and other high-tech effects and promote the role of.The proposed new model based on space exploration, to promote the study of civilian space including colleges and enterprises, through cooperation, social resources, expand the new technology and industrial revolution development areas of research, promote the development of social productive forces.
