THE DEVELOPMENT OF COMMERCIAL SPACE AND SUGGESTION

Abstract

Recent years, commercial space has been developing rapidly, followed by some commercial space items especially in manned spaceflight implementation successfully. Relative to the traditional state-led model, commercial space is more suitable for the national civil-military integration development strategy at a lower cost, higher efficiency and more innovation. Commercial space development depends on the national policy support, legal protection, advanced and mature technological, the elite talents and consummate market mechanism. China Space has made great achievement after 60 years of development but commercial space in China is still in its infancy. In this paper, based on the research of the global typical commercial space project, get some enlightenment provide suggestions and ways to the development of China commercial space especially in manned spaceflight.
