MUSICAL CD ARTWORK STYLES BASED IN SPACE: A PERSONAL PERSPECTIVE

Abstract

This work refers to the my personal experience as a musician and composer during my personal career. After signing with different record labels, I have taken space as a deep motivation to compose music, which is all over internet in different platforms: spotify, amazon, apple, to name but a few. During 20 years, I have released albums named *Fly to the Sun*, and *Sons of Orion*. Both of them have cover artworks inspired in space and space mythology. The presentation will focus on the musical artwork featured on the releases of the author and also some other artwork featured by other bands during the last years. In conclusion, a global perspective on how space influences artists will be provided by the author of the present work.
