LONG-TERM MOBILE AND STATIONARY INHABITED STATIONS ON THE SURFACE OF VENUS.

Abstract

Inhabited base on the surface of Venus? Nothing is easier!

So, the report is dedicated to the project of creating long-term inhabited bases on the surface of Venus for quite comfortable lives of researchers staying on them. The report will present a simple concept for creating such superbases right now! The author finally managed to fully solve all the technical difficulties that prevented the implementation of this sensational project!
