# STEPS TO FOLLOW AFTER ESTABLISHING CONTACT WITH EXTRA-TERRESTRIALS

**Abstract**

One of mankind's greatest questions is whether or not extra-terrestrials exist. After establishing contact, the next and most obvious question would be, what steps are to be followed after establishing contact with extra-terrestrials. There are legalities already in place for the same. One of the preliminary aims of this proposal is to answer how do us laymen participate if an alien race were to visit us. The plethora of human emotions that would unequivocally surround such a situation have to be addressed. After their arrival we would have to gauge the understanding of this alien race in terms of their knowledge and ascertain where they stand in the technological tree with respect to us. The main motivation behind this abstract is to discuss on how to maintain a relation with an alien race. Further explanation on a step-by-step routine to be adopted following the initial correspondence with them will be explained in detail in the paper.
