GEOPHYSICS EXPERIMENTS FROM APOLLO LUNAR SURFACE EXPERIMENTS PACKAGE

Abstract

Almost everyone have heard about Apollo, the missions to the Moon which took place in 1969-1972. However if you ask about what astronauts did while on surface, answers typically are... geology or science.

Talk will introduce listeners to ALSEP, that is Apollo Lunar Surface Experiments Package and time-lines for Lunar EVAs during Apollo 11, 12, 14, 15, 16 and 17.
