THE STUDENTS OF TODAY ARE TOMORROW'S EXPERTS - IAI SPACE WAY TO PROMOTE
AND MAINTAIN SPACE EXPERTISE

Abstract

We think that stem education is important. And IAI must be an encouraging force promoting stem education space is about the generation and dissemination of advanced science, multidisciplinary -space missions can only be achieved by collaboration of variety of expertise. From the educational point of view space is everything and it can be used as a trigger that is suitable to the student's nature interests. we made a plan to promote stem education to ensure sufficient talents as a growing place for expertise. we go out into academic institutions to run workshops and courses and educate about space special space courses for teachers: -"women Engineers of the Future," promotes women in STEM through a program mentored by IAI's women engineers -mentor students as they attempt to send the first ever Israeli satellite to lunar orbit thousands of students met our space technologies by our engineers also promoting ecosystem encouraging expertise
