THE PEDRO E. PAULET MOSTAJO PERUVIAN AEROSPACE MUSEUM THROUGH INSTAGRAM

Abstract

How can we spread the aerospace legacy of Eng. Pedro E. Paulet to the new generations in this era of social networks? The purpose of this work is to present the results of the dissemination of part of Paulet's aerospace work from the Instagram platform thanks to the archives of the project of the Pedro E. Paulet Mostajo Peruvian Aerospace Museum, period 2024, year of Paulet's 150 birthday anniversary. To proceed, we have used an interdisciplinary methodology in order to identify, rectify, review and disseminate specific data on the aerospace legacy of Eng. Paulet. The results have been flattering, we have received support from various personalities and institutions, in turn, in the national context, it has served as a didactic platform for the promotion of aerospace education from Paulet's work. Therefore, based on what has been done, we can say that the dissemination of the pioneers of the Space Age must continue in the mass media in order to increase aerospace awareness.
